**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

Claims 1-20 are pending.

Examiner took notice of remarks and amendment made on 09/02/04.

Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Applicants argue that Kudelka reference doesn't teach or suggest the newly added limitation in claims 1 and 11, shaping an upper portion of the trench without shaping the lower portion of the trench. Claims 1 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kudelka et al., U.S. Patent No. 6,426,254, in view of newly cited reference, Mandelman et al., U.S. Pub No. 2002/0105019. Mandelman et al. discloses a method of forming a memory storage cell similar to Kudelka and further discloses the step of shaping the upper portion of the trench to a generally rectangular configuration without shaping the lower portion of the trench (See Figs. 6D-6M; paragraphs 0050-0057). It would have been obvious to one having ordinary skill in the art to modify Kudelka et al. in view of Mandelman et al. by shaping the upper portion of the trench to a rectangular shape without not shaping the lower portion of the trench in order for the buried plate is self aligned to the upper portion shape of the trench and the capacitance of the trench is increased without increase surface area of the lower portion.

Claims 2-10 and 12-20 stand rejected as in the previous rejection.

### ***Conclusion***

For the above reasons, it is believed that the rejections should be sustained. Feature of an invention not found in the claims can be given no patentable weight in distinguishing the claimed invention over the prior art.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP ' 706.07(a). Applicants are reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire THREE MONTHS from the date of this action. In the event a first response is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than SIX MONTHS from the date of this final action.

When responding to the office action, Applicants are advised to provide the examiner with the line numbers and page numbers in the application and/or references cited to assist the examiner to locate the appropriate paragraphs.
